FALL 2018

School of Dentistry

PACE Center

Centric Relation:

Past, Present and Future
– Separating Fact from Fiction

presented by

Charles Hoopingarner, DDS
Robert Spears, PhD, MS

Friday, August 17, 2018

Synopsis

This course will present a comparison and contrast of the various generally accepted occlusal philosophies. More attention will be given to emphasizing the concurrences and concepts, rather than endorsing a particular technique. Useful techniques for tooth configuration in individual restorations, as well as anterior guidance, quadrant dentistry, single arch and full mouth reconstruction, will be demonstrated. Various techniques will be performed to enable the practitioner to deliver a higher quality service for the patient.

Limited Space Available!

UTHealth School of Dentistry
7500 Cambridge Street
Garza Classroom
4th Floor, Room 4340
Houston, TX 77054

8:30 – 9 am

Check-in | Breakfast

9 am – 4 pm

Presentation

Credit Hours

3.5 Lecture, 180 Occlusion

2.5 Hands-on, 180 Myofacial Pain/Occlusion

Course Fee

\$320 Dentist + One Allied Dental Personnel*

\$175 Allied Dental Personnel

*Information for allied dental personnel is required upon registration.
Unregistered participants will be assessed a \$175 walk-in fee.

Esthetic Principles & Veneers

presented by

Joe C. Ontiveros, DDS, MS

Friday, September 7, 2018

Synopsis

During this course, you will learn the basics for applying esthetic concepts to porcelain veneer preparation. These concepts have been proven over time and validated with scientific research. We will also discuss the principles and strategies needed when selecting ceramic materials and dental cements.

Limited Space Available!

UTHealth School of Dentistry
7500 Cambridge Street

UTHealth School of Dentistry
2nd floor lobby

Enjoy a cool treat, visit with Dean Valenza and
UTHealth School of Dentistry faculty.

presented by

Terry Tanaka, DDS

Friday, September 14, 2018

Synopsis

What do we know about TMDs and the success of current treatments for muscle and joint disorders? During this course, we will learn how splints are used to resolve TMDs and can provide solutions for seemingly complex problems. We will discuss what splints are best for pain and the most effective for stabilizing the occlusion.

Learn how splints can provide solutions for seemingly complex problems, how splints are used to resolve TMDs, test the proper OVD in worn dentitions and determine the incisal length and canine guidance before the diagnostic wax-up and tooth preparations. Results are safe, simple, straight forward and repeatable. Get the science and eliminate the 'smoke and mirrors'.

SEPTEMBER

TWO DAY PROGRAM

Integrating Lasers into Your Everyday Clinical Practice:

A Standard Proficiency Certification Course for Dentists, Dental Hygienists and Laser Safety Officers

presented by

Juliana A. Barros, DDS, MS
Charles Hoopingarner, DDS
Angie Mott, RDH

**Friday & Saturday
September 28 & 29, 2018**

Synopsis

This program is designed to enhance the practitioner's knowledge and understanding of the science, function and roles that lasers can offer your patients. We will discuss how variations in lasers' physical properties (wavelength, power and temporal modes) can be used to alter the desired outcomes. We will practice procedures on porcine tissue to learn the various techniques that can be routinely performed by the dental clinician. Frenectomies, biopsies, gingivectomies/gingivoplasties, osseous surgeries, tooth preparation and other periodontal procedures will be included for dentists, while hygienists learn debridement and sulcular decontamination procedures.

This course meets the TSBDE requirements for dentists and dental hygienists for RULE §115.2

Limited Space Available!

UTHealth School of Dentistry
7500 Cambridge Street
Garza Classroom
4th Floor, Room 4340
Houston, TX 77054

8 – 8:30 am
Check-in | Breakfast

8:30 am – 4:30 pm, Friday & Saturday
Presentation

Credit Hours

7 Lecture, 497 Lasers in Periodontics
7 Participation, 135 Laser Therapy/Electrosurgery

Course Fee

Friday **or** Saturday (One Day Attendance):
\$395 Dentist or Allied Dental Personnel

Friday **and** Saturday
\$775 Dentist or Allied Dental Personnel

This course exceeds the TSBDE required hours providing a total of 14 continuing dental education hours.

Exam Fee

\$175 ALD Standard Proficiency Exam Fee
Participants interested in the ALD exam must register and make payment by September 21, 2018 to obtain exam login information. Visit go.uth.edu/pace for complete details.

**Laser Applications in Periodontal
Treatment & Implantology**
and
**Implant Dentistry: Clinical,
Surgical & Biological Approaches**

Pediatric Tongue & Lip Ties:
Diagnosis and Treatment

presented by

Bret Dyer, DDS, MS
Sebastiano Andreana, DDS

Friday, October 5, 2018

Synopsis

Dr. Dyer will present the benefits of diode lasers in periodontal treatment. Content will be reviewed along with the different applications of the diode laser and the diagnostic steps necessary before treatment. With each application, attendees will be able to determine how to deliver treatment and what the limitations are for each approach.

Dr. Andreana's course will focus on everyday clinical surgical implant dentistry. Site development is crucial for successful and predictable implant treatment. Esthetic management of the extraction socket will be explored using the latest regenerative techniques and materials. The rationale for soft and hard tissue augmentation and maintenance of the healthy implant and the treatment of an ailing implant will be presented.

PACE Center

2nd Annual Modern Endodontics Symposium

Modern Extraction Techniques and Ridge Preservation

presented by

George Bruder, DMD
Alex Fleury, DDS, MS

Friday, November 2, 2018

Synopsis

Dr. Bruder will review the importance of coronal aces modifications that facilitate the formation of a glide path while preserving dentin. Participants will also learn today's principles of irrigation and instrument design that affect efficiency, efficacy and safety.

At last, Endodontic Evolution meets Endodontic Revolution! Dr. Fleury presents the findings after two decades of research and experimentation with NiTi rotary instruments. New adaptive 3D files have produced a revolution in simplicity, efficiency, and safety for you and your patients. True 3-D instrumentation and obturation has arrived.

Esthetic Materials & Composites:

A Hands-on Experience

presented by

Joe C. Ontiveros, DDS, MS
Magda S. Eldiwany, DDS, MS

Friday, December 14, 2018

Synopsis

Today's successful dental practitioners must be knowledgeable on the latest materials available for treating the growing population of patients seeking an improved appearance through esthetic dentistry. We will discuss the best options for dental adhesives, esthetic composites, tooth whitening, resin cements, and curing lights, with a special emphasis on materials used in esthetic dentistry. Participants will experiment with the latest esthetic composites. You will be able to implement simple techniques into your practice immediately using quality materials.

Clinical Training for Allied Dental Personnel | Coronal Polishing

presented by

Harold A. Henson, RDH, MEd, PhD

Friday, December 14, 2018

Synopsis

This eight-hour lecture and hands-on lab/clinical course is designed to provide the dental assistant with the knowledge, principles and skills to perform coronal polishing on patients under the direct supervision of a licensed dentist.

The presentation will review oral anatomy and tooth morphology relating to retention of plaque and stain; indications, contraindications and complications of coronal polishing; principles of coronal polishing, including armamentarium, operator and patient positioning, technique and polishing agents; infection-control procedures; polishing coronal surfaces of teeth; and jurisprudence relating to coronal polishing. **Upon successful completion of the coronal polishing lab, participants are required to pass a written examination with a score of 75% or higher to proceed to the clinical session of the course.**

This course meets the TSBDE Rule 114.5 Coronal Polishing for Dental Assistants
