UTHealth School of Dentistry, PACE Center Continuing Dental Education is designated as a recognized provider of the Commission for Continuing Education Recognition Program (CERP) conducted under the auspices of the American Dental Association.

Individuals should consult with their state board regarding recognition of courses accepted for re-licensure.

ADA CERP

The formal continuing dental education program of this sponsor is accepted by the ADA CERP Program for re-licensure. The current term of accreditation is from 11/1/2015 – 12/31/2019. UTHealth School of Dentistry PACE Center is a member of the American Dental Association for Continuing Dental Education.

Please call 713-486-4028 if you have any questions.
Modern Extraction Techniques and Ridge Preservation

Presented by
Andreas Ioannou, DDS, MS, FICOI
Nikolaos Soldatos, DDS, PhD, MSD

Saturday, July 15, 2017

Course Description
Atrophy of alveolar ridges following tooth extraction is a common occurrence and can severely compromise the esthetic and functional rehabilitation of patients. Preservation of the alveolar ridge has become the standard of care and a necessity for the successful contemporary clinician. Numerous options of biomaterials and surgical techniques can often be overwhelming for the clinician and can lead to improper clinical management. This course is designed to teach general dentists and specialists how to effectively and predictably maintain the dimensions of the alveolar ridge following tooth extractions and will demonstrate new techniques in exodontia to atraumatically perform extractions while preserving the bone and cortical plate. You will learn how to make extractions more predictable resulting in less chair time, a less traumatic patient experience, happier patients, and increased referrals. A unique feature of this course is the hands-on session, using dentoforms and animal models for practicing traumatic extraction and surgical techniques for hard and soft tissue preservation following extractions.

Oral Appliance Therapy for Sleep Workshop

Presented by
Paul D. Levine, DDS
Ronald S. Prehn, TM, DDS

Friday and Saturday, July 28-29, 2017

Course Description
This course is designed for dentists who have a basic knowledge of dental sleep medicine and want to learn more about Oral Appliance Therapy (OAT) while gaining a deeper understanding of practical aspects of practicing dental sleep medicine. During this advanced workshop you will learn to fabricate Mandibular Advancement Splints (MAS) to teach basic principles of OAT. How to set the MAS and titrate (with pulse oximetry) will be emphasized, along with practical ways to deal with complications and side effects of OAT. You will receive numerous forms for recordkeeping and communication between you and the physician for your patient’s OAT treatment.

This course is designed to satisfy Texas State Board of Dental Examiners (TSCDE) Rule $108.12 requirement for a dentist to treat sleep breathing disorders.

Pediatric Endodontics

Presented by
Rebeca Weisleder, DDS, MEd

Saturday, July 29, 2017

Course Description
Endodontic therapy in immature and mature permanent teeth has been a challenge in the past due to a number of variables that may be encountered during treatment. Modern technology and the introduction of new materials have enhanced chances of success for different treatment modalities. These advances have created new possibilities for vital and non-vital pulp therapy in young patients, leading to tooth conservation. The hands-on portion will review different treatment options available for general practitioners and pediatric dentists.

Educational Grants
For their continued support and participation in our sponsored programs, UTHealth School of Dentistry gratefully acknowledges Dentsply Sirona.

UTHealth School of Dentistry
Ahn Classroom (Room 4322)
7:30 – 8am
Check-in | Breakfast
8am – 5pm
Presentation
Credit Hours 4 Lecture / 4 Participation

PAID REGISTRATION
$320 Dentist
$210 Allied Dental Staff Member (Observe only)

UTHealth School of Dentistry
Garza Classroom (Room 4340)
Friday
7:30 – 8am
Check-in | Breakfast
8am – 5pm
Presentation
Credit Hours 4 Lecture / 4 Participation

Saturday
7:30 – 8am
Check-in | Breakfast
8am – 12pm
Presentation
Credit Hours 4 Lecture

PAID REGISTRATION
$725 Dentist and one Allied Dental Staff Member
(Staff information must be provided at time of registration)
$275 Additional Staff Member (Friday & Saturday)

UTHealth School of Dentistry
Ahn Classroom (Room 4322)
8:30 – 9am
Check-in | Breakfast
9am – 4pm
Presentation
Credit Hours 3 Lecture / 3 Participation

PAID REGISTRATION
$320 Dentist
$210 Allied Dental Staff Member (Observe only)
