The Robert Wood Johnson Foundation
Summer Health Professions Education Program 2019

UTHealth
The University of Texas Health Science Center at Houston
Summer Health Professions Education Program (SHPEP)

About SHPEP
The program has been shaping careers and changing the lives of premedical and predental college students for 30 years, formerly as the Summer Medical and Dental Education Program (SMDEP). Today, the SHPEP initiative has expanded to include other health careers, such as nursing, pharmacy, physician assistant and public health.

Hosted at 13 institutions across the nation, SHPEP’s goal is to strengthen the academic proficiency and career development of students underrepresented in the health professions and prepare them for a successful application and matriculation to health professions schools. These students include, but are not limited to, individuals who identify as African American/Black, American Indian and Alaska Native and Hispanic/Latino, and who are from communities of socioeconomic and educational disadvantage. For additional information, please visit www.shpep.org.

Eligibility
All students who meet the SHPEP eligibility requirements are encouraged to apply.

Applicants must meet the following requirements:

• Be a college freshman or sophomore at the time of application
• Have a minimum overall GPA of 2.5
• Be a U.S. citizen, a permanent resident, or an individual granted deferred action for childhood arrivals (DACA) status by the U.S. Citizenship and Immigration Services
• Not have previously participated in the program.

Other factors for consideration include that a student:

• Identifies with a group that is racially/ethnically underrepresented in the health professions;
• Comes from an economically or educationally disadvantaged background; and/or
• Has demonstrated an interest in issues affecting underserved populations.
• Submits a compelling personal statement and a strong letter of recommendation

Admission Process
The SHPEP application deadlines are listed below. Interested students are encouraged to apply. Applications will begin in December.

The following chart highlights the application, review, and notification process.

<table>
<thead>
<tr>
<th>Application Opens</th>
<th>November 1st</th>
</tr>
</thead>
<tbody>
<tr>
<td>Application Closes</td>
<td>February 5th</td>
</tr>
<tr>
<td>Notification</td>
<td>March</td>
</tr>
<tr>
<td>Response to Offer</td>
<td>Within 48 hours of notification</td>
</tr>
<tr>
<td>Waitlist Offered</td>
<td>Yes</td>
</tr>
</tbody>
</table>

Application materials must include the SHPEP online application form, official transcripts from all post-secondary schools attended, and one letter of recommendation from either a pre-health advisor or a college professor within your major field of study. For more information regarding the SHPEP application and notification process please visit go.uth.edu/shpep.

About Our UTHealth SHPEP

UHealth is an academic health center that educates more than 5,000 professionals each year, and that delivers health care to patients with diverse cultures, beliefs and nationalities. UTHealth is committed to creating an environment that values inclusion, collaboration, partnerships and teamwork to accomplish its mission.

The UTHealth SHPEP is grounded in collaborative relationships between the UTHealth McGovern Medical School, School of Dentistry and School of Nursing, which are the four health professions of interest for our program. The curriculum focuses on Basic Sciences, Academic Enrichment and Professional Development.

The Basic Sciences core curriculum is structured around courses relevant to health professionals, including Anatomy and Physiology, Microbiology, Physics, Statistics, Organic Chemistry.

The UTHealth SHPEP leaders recognize that the skills of well-rounded health professions students and health care providers go beyond competency in basic sciences. Changes in US demographics and issues of access to care create the need for individuals able to work across cultures. New models of health care delivery, such accountable care organizations, create the need for individuals with the leadership skills to make these new models a successful part of our health care culture. As we create a culture of health, those within the professions must understand the broad definitions of individual and collective community wellness and engage in practices that promote both. And finally, as we move towards patient centered, team-based care, having individuals who understand, value
and work towards the goal of interprofessional education and practice is essential for these models to be effective. Our Academic Enrichment and Professional Development curricula will help prepare students in these areas and serve to augment the Basic Sciences curriculum.

Interwoven throughout the curriculum and student experiences is the central theme of wellness and nutrition. This topic spans basic and clinical sciences in nursing, medicine and dentistry and the highlights how the lack of wellness and poor nutrition contributes to obesity, the leading health problem in the US. This theme also allows the program to highlight the interprofessional collaboration between healthcare providers needed to address this multi-faceted healthcare challenge.
UTHealth SHPEP Academic Program

Core Academic Curriculum

The core academic curriculum will have courses in organic chemistry, physics (for those interested in medical and dental careers), anatomy and physiology, microbiology and statistics. Lab experience in the human anatomy facility at the medical school will be offered through the six-week experience. Examples of the topics covered in the core curriculum are listed below:

**Organic Chemistry**

Organic chemistry is a specific discipline within chemistry which involves the scientific study of the structure, properties, composition, reactions, and preparation (by synthesis or by other means) of chemical compounds consisting primarily of carbon and hydrogen. Class time will be a mix of lecture and group work to aid in the understanding of key concepts. Homework assignments will reinforce and develop the ideas discussed in class.

**Physics**

This course will provide students with an introduction to some of the key concepts in physics, such as motion, force, heat, fluids, and waves. An emphasis will be placed on how the physical principles apply to the mechanics of the human body. Class time will consist of a combination of lecture, demonstrations, and hands-on group work. Homework assignments will reinforce and develop the ideas discussed in class.

**Anatomy and Physiology (A&P)**

The lecture portion of A &P emphasizes problem solving with clinical situations that involve anatomical terminology, homeostatic mechanisms and pathologies associated with the skeletal, muscular and nervous systems. The lab portion includes hands-on gross anatomy lab experiences with bones, joints, muscles, brains and other internal organs.

**Statistics**

Statistics is the study of research outcomes. Over the six weeks, you will be introduced to the concepts that are used in reporting the results of research. Even if you will not be producing research in your practice, you will likely be reading the results of others’ research.

An understanding of statistics is essential if you want to read the reports in academic journals. Class time will be a mix of lecture and group work. Homework assignments will reinforce and develop critical thinking based on the ideas learned in class.
• Calculator Requirement for Statistics Course
  Accepted scholars are **required** to bring a statistics-friendly calculator for the Statistics course: Texas Instruments 83+ or 84. Specs/features and user guide may be accessed by clicking on the following links:

  - TI-83 Plus
  - TI-84 Plus Silver Edition
  - Guide for TI-83, TI-83 Plus, or TI-84 Plus Graphing Calculator

**Academic Enrichment and Professional Development Curriculum**
Examples of topics to be covered in the academic enrichment and professional development curriculum are listed below:

**Health Policy**
Health Policy is the study to improve health systems to meet their objectives in terms of health outcomes, financial protection and responsiveness to the population’s legitimate expectations. This six-week educational experience will focus on key principles in policy making and health policy and exposure to critical health care issues.

**Professionalism and Cultural Competency**
Scholars will experience special topics in humanism, professionalism, ethics and cultural competency. These topics will be introduced by highly regarded faculty with known expertise in these areas.

**Communication Skills**
Small-group experiences in the Art of Communication course will help develop communication skills relevant to health professionals. Scholars also will prepare for health professions school interviews by working on mock interviews with the tutors.

**Clinical Exposure**
Scholars will experience limited clinical exposure through a diverse range of settings including shadowing individual clinicians, small-group clinical rotations and full-group seminars with highly experienced and expert clinicians.

**Learning Skills Development**
Emphasis is placed on developing learning strategies to be a successful student in professional school. Topics may include strategies to improve study habits, note-taking strategies, test-taking skills, time management, and use of information resources (*library and Web*).
Financial Planning

A nationally recognized expert in financial planning will work with the scholars to assist them in developing individualized career plans and in implementing financial management strategies.
STUDENT LIFE

Houston is a diverse city with a large and growing international community. Many annual events celebrate the diverse cultures of Houston. The largest and longest running is the annual Houston Livestock Show and Rodeo, held over 20 days from late February to early March, which is the largest anywhere in the world. Another large celebration is the annual night-time Houston Pride Parade, held at the end of June. Other annual events include the Houston Greek Festival, the Houston Auto Show and the Bayou City Art Festival, which is considered to be one of the top five art festivals in the United States.

Houston has an active visual and performing arts scene. The Theater District is located downtown and is home to nine major performing arts organizations and six performance halls. Houston is one of few US cities with permanent, professional, resident companies in all major performing arts disciplines; Houston Grand Opera, Houston Ballet, Houston Symphony Orchestra, and The Alley Theater.

The Museum District has many popular cultural institutions and exhibits, which attract more than 7 million visitors a year. Notable facilities include The Museum of Fine Arts, Houston, Houston Museum of Natural Science, The Health Museum, the Contemporary Arts Museum, Houston, the Station Museum of Contemporary Art, Holocaust Museum Houston, and the Houston Zoo. Located outside, but within proximity of the Museum District are The Menil Collection and Rothko Chapel. Houston has teams for nearly every major professional sport. The Houston Astros (MLB), Houston Texans (NFL), Houston Rockets (NBA), Houston Dynamo (MLS), Houston Energy (IWFL), and the Houston Power (WFA) all call Houston home.
SOCIAL ACTIVITIES (FREE)

SHPEP-sponsored events include a Welcome Dinner at check-in, scholar talent show, and Graduation Ceremony with reception. Scholar-organized events have included movie nights in the dorm and cookouts on the Rice campus. Additional activities in the Houston metro area are listed below:

**DRESS CODE**

Students are expected to maintain a professional personal appearance at all times. Alternatively, option to wear scrubs daily while on campus.

During operating hours, infection control mandates that students may not wear any of the following:

- shorts
- mini-skirts
- open-toed shoes
- tank tops
- capri pants
- muscle shirts
- halter tops
- baseball caps
- jeans
- tennis shoes
  (unless wearing scrubs)

**Scrubs are required in order to participate in the Clinical Observation and Simulation Lab sessions for nursing, medicine and dentistry participants. In this instance, you MUST also wear tennis shoes that are CLEAN and covering the entire foot. You are allowed to wear scrubs at all times during the program.**

These personal appearance standards are in effect from 7:00 a.m. to 6:00 p.m. Monday through Friday. Students who are not in compliance with these minimal dress requirements will not be allowed to remain in the building and will be required to return to the dorm to change clothes.
UTHEALTH SHPEP Meals, Stipends, Housing and Travel Assistance

Meals
At least two meals per day, Monday-Sunday. Students may also have the opportunity to purchase Tetra cards (Rice U. meal cards) during the check-in process, to be used on the Rice campus only (eateries & the “convenience stores”.)

Stipends
Stipends, totaling $600 for the entire program, will be distributed on the following dates:

• June 1
• June 16
• July 1

The dollar amounts of each stipend will be calculated according to the total number of days of the program/number of days in each pay period.

Housing: Rice University Dorm Information
Rice is a private, independent university dedicated to the "advancement of letters, science, and art." Occupying a distinctive, tree-shaded, nearly 300-acre campus only a few miles from downtown Houston, Rice attracts a diverse group of highly talented students with a range of academic studies that includes humanities, social sciences, natural science, engineering, architecture, music, and business management.

Rice University is approximately three blocks from the UTHealth McGovern Medical School (MS). Scholars will walk to the MS for classes/events when scheduled in that building. When scheduled at the UTHealth School of Dentistry (SOD) or School of Nursing (SON), scholars will use the UTHealth Shuttle which picks up outside the MS. UTHealth ID Badges are REQUIRED to board the shuttles. Laundry Facilities are available in each residential college free of charge.

Travel Assistance to/from Houston
Need based with cap of $500/eligible disadvantaged scholars. Scholars need to complete application to apply for assistance. Scholars must live more than 100 miles from SHPEP site to be consider for air travel assistance. If students are traveling more than 100 miles away from SHPEP site, we will reimburse car mileage after completion of program.
If you have, questions contact Griselda Avila (UTHealth-SHPEP@uth.tmc.edu), SHPEP Manager.

**Things to bring to the Rice Dorm**

Each student will be assigned a twin bed/mattress, closet or wardrobe, desk and desk chair. There are no phones or phone service.
